Turner USD 202 Board of Education,

This is a summary of the attached change order (CO) that took place during construction at Turner Middle School while renovating the restrooms in the performing arts hallway. There were also CO's that took place during the construction process at Turner Elementary Pre-K remodel.

The most notable CO at Turner Middle School was furring out of the walls that was required and not known during the design phase. Once demolition started is was discovered the walls were curved and that would cause an issue with the ceramic tile. The other notable CO was adding a mop sink in the mechanical room. The remodel included removal of the custodial closet between the classrooms, which left this entire area without a mop sink or area for cleaning supplies. The overall cost of these change orders is \$5,392 for the scope of work at TMS.

The most notable change orders at Turner Elementary Pre-K addition were to add floor drains to the restrooms above the space in the library. While the area was demolished there was a flood in the restrooms which flooded the area below due to there not being any floor drains. There was a dispute as to whether or not a new electrical panel was called out in the bid documents, which was supplied by the GC at no charge, but there was additional electrical work conducted due to the outside lights not being properly wired and additional low voltage wiring that IT needed added. Signage was to be provided by the owner, and I wanted the contractor to handle that, so that is one of the notable change orders. There was abandoned duct work above the ceiling in the upstairs rooms where the HVAC was upgraded, which needed to be removed for the new units to be installed. The drop ceilings in the upstairs rooms were not called out to be removed and replaced and with the new HVAC units, I thought this would be a nice way to clean those rooms up at the same time. The most notable CO was to add a fence in the drop off pick up area to prevent a child from rushing into traffic. The overall total of the CO's at Turner Elementary totals \$45,862.00

There was and additional CO in the amount of \$11,700 that was forgiven by the contractor for not being completed on time.

This process will be much more transparent in the future, Combes Construction is aware that moving forward on projects we will need CO's as the project moves along and not be bundled at the end of the project.

Sincerely,

my

Chris Crockett

Bryant and Chris,

Star Signs has provided pricing (see below) for warning stickers for the changing tables and their associated step units at TES student restrooms. They will be similar to the images shown. Artwork approval is pending notice to proceed.

We believe these should be added to the signage package for this project.
